

Our Services

Mydestiny Web specializes in custom website design and consulting. We also provide premium business hosting services and domain name management for a complete solution for your small business. We understand the importance of a strong internet presence to serve both new and existing customers. Our services combine experience and creativity to produce attractive, professional, and affordable websites that will sell your business effectively. Customers surf the internet 24 hours a day, 7 days a week to seek information on products and services they wish to purchase. Your website must:

- be easy for customers to find on search engines
- present detailed information about your product or service
- be visually appealing and easy to navigate

In particular, our work has focused on a few key areas recently:

Content Management Systems

When operating a large website, a Content Management System (CMS) is used to manage the many pages which can for the first time be edited by you, the client. Our clients find the the ability to update their own website saves countless hours and hundreds of dollars. Say goodbye to FTP and bulky design programs like Frontpage or Dreamweaver. We have designed many websites powered by CMS software entirely online. Our clients can run their sites easily from any computer without any technology training or experience. As a result their maintenance fees are virtually non-existent.

E-commerce

Looking to sell your products online? The start-up costs may not be as high as you expect! Mydestiny Web can implement simple or a more advanced e-commerce software, OSCommerce, and teach you how to add products, accept payments, and manage your inventories.

Consulting

Launching a new website, purchasing new equipment, and advertising online are just some of the daunting technology decisions you may face. An informed expert's advice on these issues is invaluable in making these long-term, expensive decisions. At Mydestiny Web we have worked with many small business through the same problems you are likely facing. Our research, analysis, and advice will point your business in the right direction and save you time and money down the road.

From start to completion, Mydestiny Web Design will work along side you to create a website that caters to your unique needs. We offer free consultations to answer your questions about our services and websites in general. Contact us today at darrell@mydestiny.com. You might require a website with some interactive functionality, for example a membership site, or an online booking system.
